

T306

T302

Solo telo invernale  
Only winter cloth

Tenda a caduta, dal design ricercato, con doppio rullo avvolgitore, per telo estivo e invernale.

Telo invernale semitrasparente inserito nella doppia guida dotata di doppio spazzolino per riparo dal vento.

Supporti e snodi in alluminio pressofuso, garantiscono un'ottima resistenza e qualità estetica.

Profilo terminale rinforzato, con chiavistelli, permette una perfetta tensione del telo. Guarnizione in PVC morbido, adatta agli eventuali dislivelli del pavimento. Protezione solare a caduta verticale senza braccetti.

Optional: 2 motori radio con finecorsa elettronico e riconoscimento degli ostacoli con telecomando o 2 motori elettronici con programmazione a pulsantiera e riconoscimento degli ostacoli.

Vertical blind by refined design, with double roll for summer cloth and winter cloth. A semi-transparent cloth works vertically in double rail equipped with double brush for wind protection. Components in die-casted aluminium, which guarantee an excellent resistance and aesthetic quality.

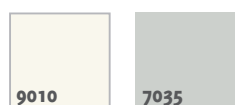

Reinforced front bar profile, with bolts, allowing a perfect tension on winter cloth. End gasket in soft PVC for covering unlevelled floors.

Vertical sun protection cloth with no arms.

The structure can be equipped with the following options: Exterior cassette with screws and brush, Internal cassette with screws, brush and plates, Middle wind-break for winter cloth.

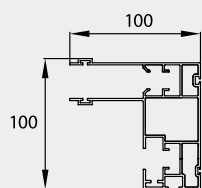

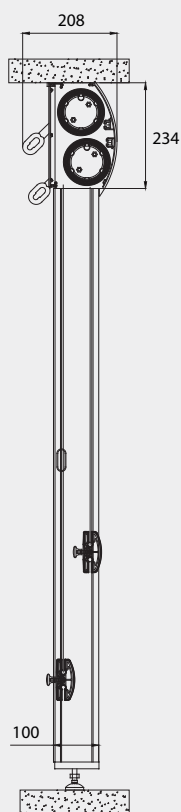

n.2 RTS motors with electronic end regulation and obstacle identification with remote control. n.2 electronic motors regulated by button programmation and obstacle identification.
